- * EAI Day
- * Promoting EAI @ #ICANN60

EAI Landscape

- * There are 14 email software and service providers that we think have EAI either in production or under development

Afilias	Apple	Coremail (China)
Exim	Google	Halon
Horde (USA)	IOS Mail App	Microsoft
MuTT	OpenFind (Taiwan)	PostFix (Global)
SaudiNic (Raseel)	Sendmail	Throughwave (Thailand)
XgenPlus (India)	Yandex (Russia)	

- * (based on review at EAI Gathering April 2017)

Xgen Plus

Microsoft

DIY

Thailand

EAI Mailbox ‘downgrading’

- * Mark to provide discussion slide

EAI & IDN TLDs (cc & g)

- * TWNIC Report from earlier this year shows higher retention and satisfaction of IDN domain names when EAI available

<https://ccnso.icann.org/meetings/copenhagen58/presentation-twnic-chinese-eai-15mar17-en.pdf>

- * How do we encourage EAI providers and IDN TLD (cc & g) providers to work together?

EAI Documentation & Evaluation

- * Documentation Contract Pending
- * Measuring EAI Readiness
 - * What are the criteria for success
 - * What are the criteria for inclusion in the testing
 - * Still looking for a provider

EAI Day

- * What is it?
 - * EAI Day 1 - A Day that's publicised when most of the world's very large email service providers can send to and receive from EAI addresses
 - * EAI Day 2 – A Day that's publicised when most of the world's very large email service providers and HOST EAI Addresses.
- * Criteria
- * Who needs to be engaged?

Promoting EAI @ #ICANN60
